

Corten Steel Effect on Fibreglass

A game changing & revolutionary finish of exceptional standard & realness. Bringing the ever popular Corten Steel finish to places real Corten Steel is just not possible.

- Delivered “pre-rusted” so no need to wait a few months for weathering / Rusting
- Around 1/3 of the weight of Real Corten so great for use in particular on roof terraces & gardens.
- The rust layer is sealed and therefore omits any risk of traditional run off staining associated with Corten Steel and so can now be used on patios & decking where never before possible.
- Also omits the risk of rust transfer to hands & clothes when touched so now a much better option for public spaces.
- Will last as long if not longer than Corten Steel.
- Fibreglass is incredibly workable so complex shapes and sizes can be achieved in a flawless finish with no visible welds etc...
- Planters & Ponds available.
