

Textured Matt Finish

Polished Finish – Matt, Satin or Gloss

The classic textured finish is a smoothly rippled matt effect created using a thick coating of self colour gel, to the same exacting specification as Lloyds approved marine grade materials used in boat building. This is our longest lasting, commercial grade finish, highly resistant to casual damage and stuffed full of UV filters. It's corrosion resistance is legendary, designed to survive long years in close contact with sea water. This finish will remain unchanging in the harshest of environments for many years. While the colour range is less varied than wet paint, we can still match all the usual RAL & BS colours plus a good deal of the more common commercial paint colours. Send us an original and we will usually be able to achieve a very close match.

Textured Matt Finish

With a full, professional bodyshop, we are able to offer almost any colour and finish of paint either on the market today, or even going back 50 plus years, from just about any UK manufacturer.

We can match to almost anything given a physical sample and offer full gloss, satin and matt coatings as standard options.

RAL, BS and Pantone colours are all available ready matched along with all your favourite specialist paint colours. We have everything mix using computer controlled machinery to ensure you get the exact colour required.

The paint itself is quite simply the highest quality, longest lasting and most weather resistant on the market, and like our products, **100% made in the UK.**

When coated, flat fibreglass has the exact appearance of powder coated steel but with none of the weight, cost, and in steels case, rusting issues that come with this material, which in our long experience is one of the worst materials available if you want a long lasting, good looking, maintenance free, product.

Polished Planters are perfectly smooth without any Texture

MATT - These paint finishes deliver a smooth, subtle look and show little to no sheen as Matt paints absorb light.

SATIN - A Satin finish reflects more light than Matt and less than Gloss. You will get a slight sheen but not a Full high Gloss shine. A great inbetween that easier to keep clean.

Gloss - These paint finishes reflect the most light, providing a bright high Gloss deep sheen. Great for adding reflections to a space.
